

CAR RACING GAME using AI to CONTROL COMPETITOR CARS

Ataberk Baran Sütcü

Hasan Can Bayram

Umutcan Dansık

Supervisor: Serdar Arslan

Çankaya University, Department of Computer Engineering

Abstract

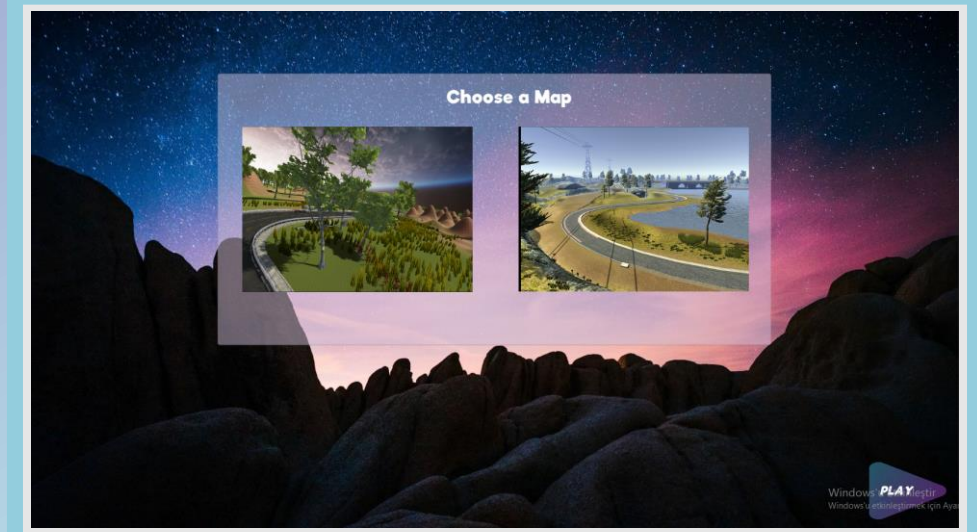

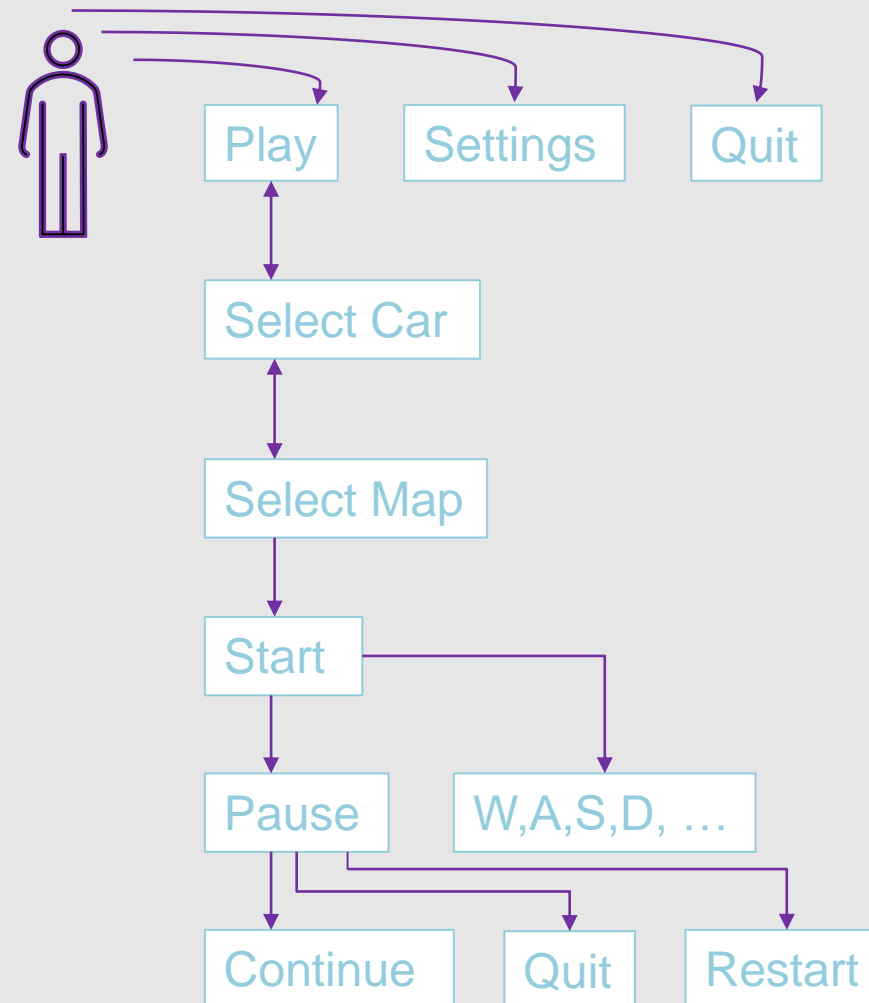

The abstract should contain a very short description (100 - 250 words) of the report. When you write the abstract, imagine that the reader will not read anything else, but you must get your major point across immediately.

Keywords: describe, main, words, here

Introduction

The introduction should contain the following information: problem statement, background or related work, solution statement, contribution.

Results & Conclusion

The last section describing your work should be an experimental results section showing textual or graphical output obtained from running your programs. You can include some facets of the implementation here but do not swamp the reader with code.

State what you learned from your work. Summarize what you did. State what you learned. State future work and directions, and then list any open problems.
